

Previous Relevant Vaccination:

Disease	Fully Immunized	Partially Immunized	Not Immunized	Not age eligible for vaccine
Pneumonia (Clinical or Radiologically Documented)	Received all age appropriate doses of Pertussis, Hib Measles containing vaccines and conjugate pneumococcal vaccines	Received either not all of Pertussis, Hib, Measles containing vaccines and conjugate pneumococcal vaccines or not all age appropriate doses	Not received any dose of Pertussis, Hib, Measles containing vaccines and conjugate pneumococcal vaccine	Less than 6 weeks of age
Acute Bacterial Meningitis Etiology Not known	Received all age appropriate doses of conjugate Pneumococcal and Hib vaccines	Received either not all conjugate pneumococcal and Hib vaccines or not all age appropriate doses	Not received any dose of conjugate Pneumococcal and Hib vaccines	Less than 6 weeks of age
Acute Bacterial Meningitis Pneumococcal	Received all age appropriate doses of conjugate Pneumococcal vaccine	Received conjugate Pneumococcal vaccine but not all age appropriate doses	Not received any dose of conjugate pneumococcal vaccine	Less than 6 weeks of age
Acute Bacterial Meningitis Hib	Received all age appropriate doses of Hib vaccine	Received Hib vaccine but not all age appropriate doses	Not received any dose of Hib vaccine	Less than 6 weeks of age
Acute Bacterial Meningitis Meningococcal	NA	NA	NA	NA
Acute Bacterial Meningitis – Other than P/H/M	NA	NA	NA	NA
Measles	Received 2 doses of measles containing vaccine (MCV)	Received only one dose of measles containing vaccine (MCV)	Not received any Measles Containing Vaccine (MCV)	Less than 9 months of age
Mumps	Received 2 doses of mumps containing vaccine	Received at least one dose of Mumps containing vaccine	Not received any Mumps containing vaccine	Less than 15 mths of age
Diphtheria	Received all the age appropriate doses	Received vaccine but not all age appropriate doses	Not received any dose of DTP vaccine	Less than 6 weeks of age
Pertussis	Received all the age appropriate doses	Received vaccine but not all age appropriate doses	Not received any dose of DTP vaccine	Less than 6 weeks of age
Chicken Pox	Received 2 doses of varicella vaccine	Received only one dose of Varicella vaccine	Not received any Varicella vaccine	Less than 15 months of age
Enteric Fever (Typhoid & Paratyphoid)	Received typhoid vaccine within last 3 years	Time lapsed since last immunization > 3 years	Above 2 years and not received any typhoid vaccine	Less than 2 years of age

Dengue	NA	NA	NA	
Hepatitis B	Received 3 doses Of Hepatitis B vaccine	Received less than 3 doses of Hepatitis B vaccine	Not received any Hepatitis B Vaccine	Less than 6 weeks of age
Hepatitis A	Received 2 doses of Hepatitis A vaccine	Received one dose of Hepatitis vaccine	Not received any dose of Hepatitis A vaccine	Age less than one year
Hepatitis E, Hepatitis O (Others) Hepatitis N (Etiology not known)	NA	NA	NA	NA

	Age appropriate vaccination schedule
Diphtheria	DTP/ DTaP at 6-8 weeks, 10-12 weeks, 14-16 weeks, 15-18 mths, 5 years and then Td/ Tdap at 10-12 years
Pertussis	DTP/ DTaP at 6-8 weeks, 10-12 weeks, 14-16 weeks, 15-18 mths, 5 years and then Tdap at 10-12 years
Hib	Hib containing vaccines at 6-8 weeks, 10-12 weeks, 14-16 weeks, 15-18 mths
Conjugate pneumococcal vaccines	PCV at 6-8 weeks, 10-12 weeks, 14-16 weeks, 12- 15mths
Measles	1 st dose at 9 mths and 2 nd dose as MMR/ measles at 15 mths
Mumps	1 st dose as MMR at 15 mths and 2 nd dose anytime 3 months after the 1 st dose or upto the age of 5 years
Chicken pox	1 st dose at 15 mths and 2 nd dose anytime 3 months after the 1 st dose or upto the age of 5 years
Typhoid	1 st dose at 2 years and then every 3 years
Hepatitis A	1 st dose at 12 months and 2 nd dose at 18 months
Hepatitis B	3 doses at 0,1, 6m or 6w,10w,14w
